PROFILE

I'm looking for a job as a Junior **Software Testing Engineer**. I'm focused on going above and beyond to support team.
In my opinion, I have quite good communication skills (courses in psychotherapy: Existential therapy, Cognitive behavioral therapy). Through my work I was able to gain crucial skills: work under high loads, teamwork.
I would be happy to become part of the team and work in a creative atmosphere of professionals.

WORK EXPERIENCE

August 2019 – February 2022
Psychiatrist-narcologist, Clinical Drug Addiction Treatment Center.

Organized the training documentation for interns; Trained co-workers to fill out documentation in digital form; Reorganized the patient record system.

EDUCATION

Faculty of Medicine, Belarussian State Medical University 2013 – 2019.

COURSES

Software Testing Introduction, EPAM Systems   February 2022 - March 2022.

Test IO (Crowdtesting Platform)   July 2022 – present.

SKILLS

- **Functional testing**.

- **SDLC, Agile methodology (Scrum, Kanban)**.

- **Test design techniques** (Equivalent Class Partitioning, Boundary Value Analysis, Decision Table Testing, Pairwise Testing).

- **Requirements analysis**.

- **Creation of test documentation**: checklist, test case, bug report, test plan, test resulting report.

- **Understanding Client-Server Architecture**.

- **DevTools**: viewing code elements, errors, scripts, and server responses.

- **Postman**: GET, POST, PUT, DELETE, PATCH, creating environment variables, checking JSON structure, status code.

- **SQL query writing** (SELECT, JOINS, GPOUP BY, etc.).

- **Git/ GitHub/ Git Bash**: working with local and remote repositories; creating and deleting repositories; creating and deleting files; creating, merging, deleting, moving branches.
